Garden building collection

Inspired by tradition

CRANE
GARDEN BUILDINGS 

This collection is inspired by beautiful buildings within National Trust estates.

Inspired by ages gone by yet using modern techniques, this range of garden buildings is affordable and beautiful. They are real gardener's retreats, with traditional design features such as vertical sawn boards, a corrugated roof and a very attractive colour palette to choose from to suit any garden.

We took our inspiration from the outbuildings and summerhouses of several National Trust properties scattered around East Anglia. We visited, photographed and literally got a real feel for these buildings of bygone times in these wonderful grounds.

We researched materials and construction and in collaboration with the National Trust we drew our designs. These garden buildings will nestle in any garden, they are low

maintenance and finished in a range of traditional colours to suit your surroundings.

Constructed from timber sourced from an FSC® certified forest and timber mill, the environmental sustainability of our product is very strong. In fact, the garden sheds and summerhouses themselves are FSC® certified, which complements our company's environmental policy. All of our buildings are manufactured in our Norfolk based factory by skilled craftsmen, and are then installed by our professional team in your garden.

For each product sold a contribution is made to the National Trust to help look after and conserve special places for ever, for everyone.

Included Features

Handmade to order in our Norfolk workshop

Delivered and installed in your garden

Crafted from FSC® certified
Scandinavian redwood

Under 2.5m high to meet modern

Colour Palette

This colour palette has been inspired by the special places cared for by the National Trust. There are 6 natural colours to choose from that will allow the buildings in this range to blend seamlessly into your garden.

This colour chart is designed to provide an indication of the colours in our palette. It cannot be taken as an exact replication of colour; however, we are happy to send out colour samples.

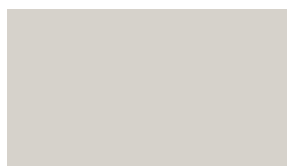

Wades Lantern

Terrace Green

Dome Ochre

Earls Grey

Painters Grey

Specifications

Side Walls

12 x 150mm sawn cladding topped with 14 x 30mm sawn cladding on 38 x 50mm planed framing.

Door

For the summerhouses one pair of joinery made, double doors 1830mm wide x 1100mm. $\frac{3}{4}$ glazed with 4mm toughened safety glass and cross leaded. Fitted with a mortice lock and finished with black Fleur-de-Leys hinges and door handles.

For the sheds a 710 x 1800mm joinery made, ledged and braced door, hung with the use of black strap hinges and secured with a mortice lock and black handle.

Windows

For the summerhouses, 4 cross leaded, 4mm toughened safety glass windows set into a joinery made frame. 2 of the windows opening and furnished with black Fleur-de-Leys casement stays and window fasteners.

For the sheds, fixed Georgian windows fitted with 4mm toughened safety glass set into a joinery made frame.

Floor

Ex 19 x 125mm tongue and groove floorboards on 38 x 50mm tanalised planed floor joists set at no more than 450mm centres.

Roof

Ex 19 x 125mm tongue and groove roof boarding on an Ex 38 x 50mm frame covered with corrugated roof sheeting.

Height

All buildings are under 2.5m to the ridge, to meet planning requirements, and have an internal eave height of 1.9m on the Blickling, Peckover, Felbrigg, Orford, Lavenham and Ickworth. And 1.8m on the Oxburgh and Flatford.

Paint

Painted with a coat of microporous paint, please choose your colour from our National Trust palette.

Crane Garden Buildings is a family run business, making timber buildings in Norfolk for nearly 50 years. We are proud to acknowledge that much of our trade is built around our reputation, and we firmly believe that this is because we provide a personal service from design stage to installation, where the customer always comes first and is delighted with their building.

Our buildings are exceptional and unrivalled. We source the best quality timber and materials for every stage of our building process right down to the paint systems we use.

We employ skilled craftsmen and a well regarded installation team to finish your building to the very highest of our expected standards.
